

OneCore Loans App
Loan management
software which
increases the efficiency
of your processes

70%

of automated processes that you no longer have to handle

60%

saving time due to mass operation features in the portfolio of contracts

100%

of your needs covered thanks to our expertise in financial services

OneCore Loans App covers complete credit and loan management agenda.

Loan management software automates your day-to-day operations, easily adapts to all your needs or changing requirements and helps process large amounts of data. The solution covers all credit phases, from the calculation, through the loan conclusion to its termination and settlement. All this is within a single application in the Microsoft Dynamics 365 Business Central and fully compatible with Office 365 package.
