

## OneCore Quick Calculator

# Online leasing calculator

Quick Calculator is an online web application that allows you to create financing offers quickly, easily and tailored to your customer.

Enter basic parameters – vehicle information, equipment, insurance and financing terms – and the calculator instantly generates a **3×3 matrix of offers**. You can then select the most

suitable option for your customer, **download it as a PDF** including your company's branding, or **send it straight to them via email**.

**Saving time  
for traders  
and dealers**

**Quick and easy  
calculations  
of leasing offers**

**Better customer  
experience  
through efficient  
service**

**Flexible  
use – standalone  
or integrated into  
your system**

## Key features:

User-friendly environment – configuration of leasing offer in 6 steps within 2 minutes

Flexible web application with standalone setup including equipment, insurance and pricing

Easy integration with core systems like OneCore and others according to predefined API

Responsive design fully customizable to your brand, setup on desktop, tablet and phone

Clear offer history

Electronic communication with customers, including email offer sharing and PDF export

Simple setup to manage roles, rights and user access

High data security with Microsoft Azure

The OneCore Quick Calculator is designed **to save time, simplify the work of dealers and salespeople** and enable them **to serve customers more efficient-**

**ly.** Whether you're dealing with a customer in the branch or you want to send them an offer online, this app puts **the solution quickly at hand.**
